CONTINGENT MANAGEMENT FOR VISITORS

/ LIMITED
RESOURCES
MANAGE
EFFICIENTLY!

ONE PARKING AREA - MULTIPLE TENANTS

/ Who parks on your property?

entervo smart tenant allows property managers to professionally and efficiently manage the parking of their facility. As user profiles of car parks can sometimes be difficult to manage, the tool allows the property manager to assign individual contingents to multiple tenants. The individual tenants are responsible for the management of the users within the contingent. They can assign the parking spaces to their own employee fleet or register visitors for determined time slots of the day. The technology makes sure that only registered users may enter the parking area within their assigned time frames. **Simple and flexible!**

/ Clear and straightforward

ENTERVO SMART TENANT CONCEPT

- 1** EASY MANAGEMENT
One central admin can easily assign and manage various sub-admins (tenants) with authorization profiles that are limited to their own contractual environments.
- 2** AUTHORIZATION MEDIA
Depending on the hardware setup of the car park, various authentication media can be processed and assigned. The car fleet of a tenant could for example be registered with their license plates, while QR Codes could be sent out to visitors via email.
- 3** CLEAR CONTINGENTS
Tenants can manage their contingent independently. A clear dashboard provides clarity about the user groups and their capacity utilisation. The contingent per user group can be dynamically adjusted if necessary. A simple and efficient mechanism for modern parking management.
