NEW-GENERATION PARKING MANAGEMENT SOFTWARE

- / MORE DIGITAL
- / MORE INTUITIVE
- / MORE SECURE
- / MORE VERSATIL
- / MORE EFFICIENT

FULLY FOCUSSED ON ADDING VALUE

/ Current and future-proof

You'll know entervo as a professional, versatile, and individually customisable parking management software. Now we are taking this solution to the next level: entervo V3 features a new look & feel, enhanced operation, new functionalities for your business, comprehensive protection against cyber-attacks and with state-of-the-art patch management. This means you are fully equipped for the future and always up to date. The desire of our 'in-house' software and hardware development professionals is to continuously strive to make sure that you can feel and ultimately share our **Passion for Parking**. Upgrade now to entervo V3 and benefit from the best entervo ever.

/ Your gateway to digitising parking

VERSATILE, SMART AND CONNECTED

Car parks are developing into mobility hubs, parking is perceived as a part of the mobility chain. With entervo V3 you have the **right tool for handling this change**. In this way you can take part in the world of digital parking even more easily and benefit from a variety of digital parking products. Ticketless parking is already becoming a convenient standard for you and your customers. Thanks to the integrated connection to mobility CONNECT, you can authorise any desired mobility service provider for your car park or interact with other digital service providers. You can use digital payment systems and incorporate visual communication. And these are just a few of the many added values.

/ The safest entorno

MINIMISES CYBER-CRIME

The interconnectedness of electronic systems makes it necessary to **protect** computers, servers, mobile devices, networks and data from **malicious attacks**. The threat of cyber-crime is omnipresent. For us, defending against such attacks has the highest priority. That is why we have linked entorno V3 with Secure Configuration, making it the most secure entorno ever. In addition to internal security features, entorno V3 comes as standard with enhanced password handling that makes attacks more difficult. Furthermore, our optional patch management service ensures that you always automatically receive the latest updates and security patches.

/ Automatic update

ALWAYS UP TO DATE

Your parking management system is always up to date thanks to regular software updates. The optional entervo V3 [software maintenance package](#) always ensures this. A remote service contract ensures you always receive the latest service packs with the associated security checks. At the same time, you automatically benefit from updates to the programme features and functional improvements.

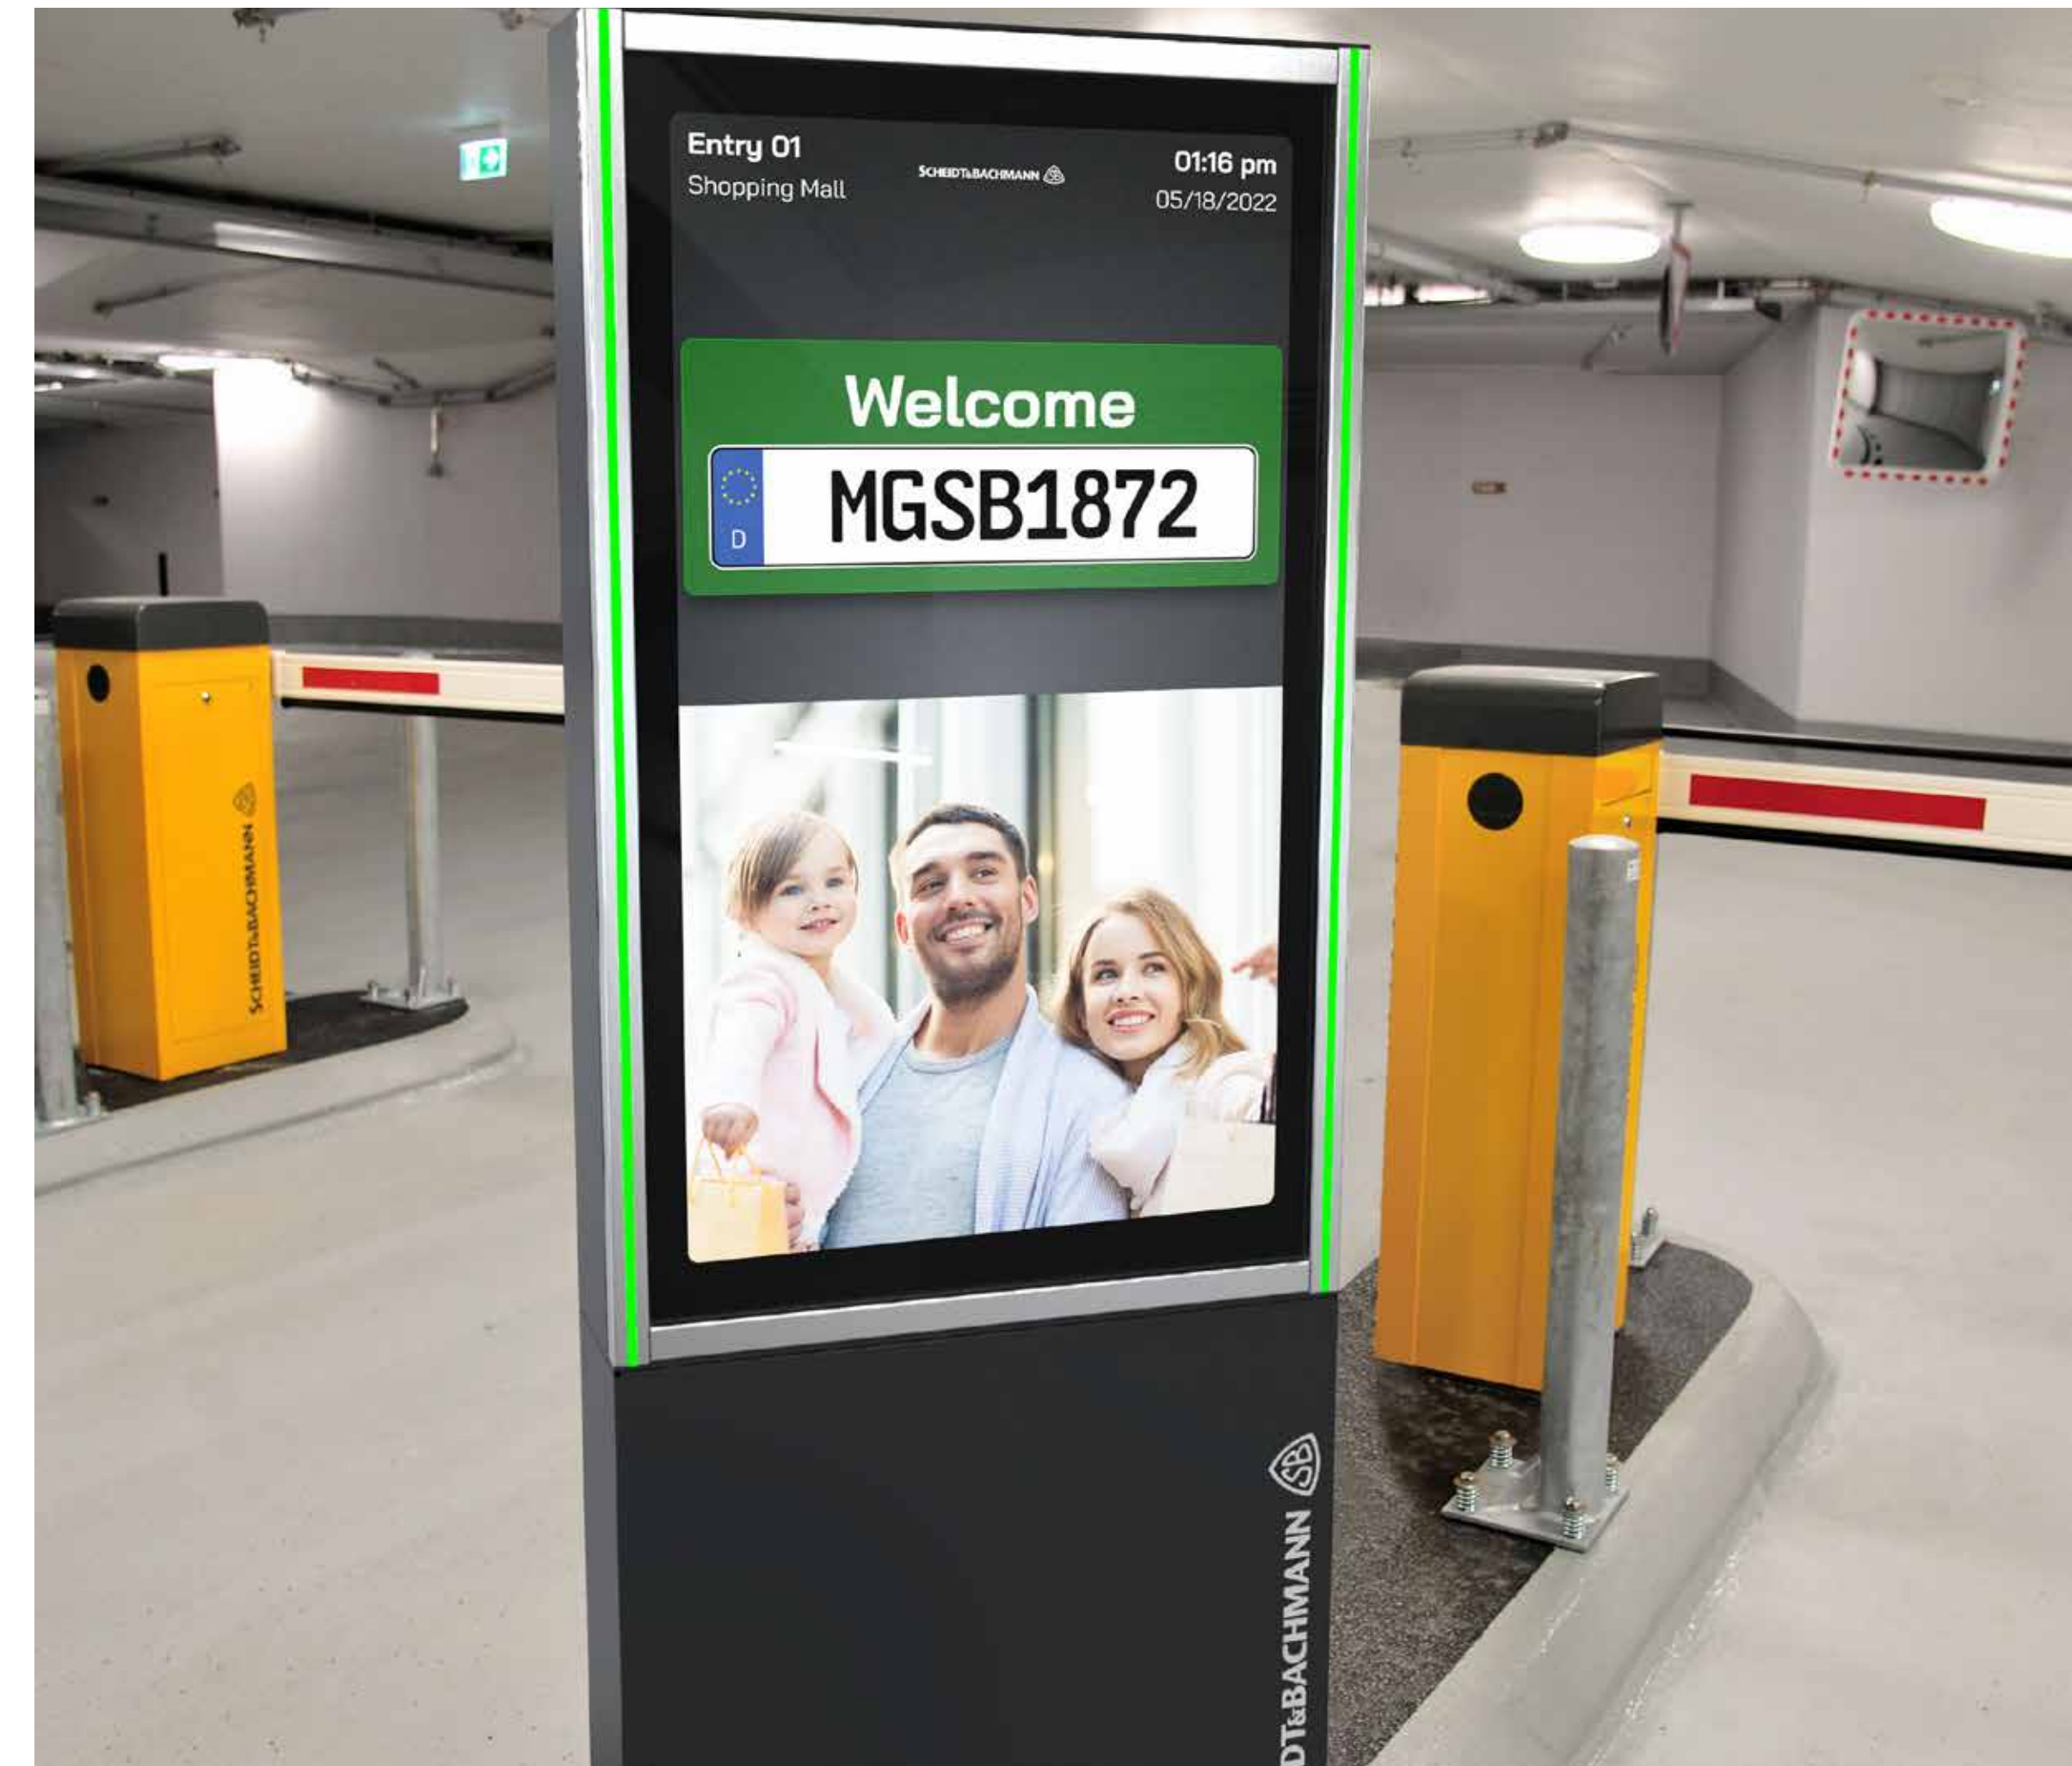

/ Your key to digital advertising

COMMUNICATE WITH YOUR CUSTOMERS DIRECTLY

As a car park owner/operator, you want to **connect with your customers**.

Be it through a warm welcome, information about ticketless parking, target group-specific advertising or tips on the local area. The entervo.sign customer display as a module of entervo V3 opens up these and many other possibilities for you. This allows you to communicate with customers in a high-quality and informative way at the entry and exit areas of your parking area. Above all, you open up new opportunities for Digital Out Of Home advertising (DOOH) and thus additional revenue opportunities by being able to sell advertising space.

YOUR BENEFITS AT A GLANCE

MODERN USER INTERFACE

Ergonomics and user-friendliness are state-of-the-art. The new interface with its attractive look and feel makes it even more pleasant to use.

HIGH SECURITY

In addition to internal security features, entervo V3 features enhanced password handling, minimising vulnerability to cyber-attacks.

PATCH MANAGEMENT & SOFTWARE MAINTENANCE

You benefit from continuous improvements in the areas of system security and functionality. Updates are automatically installed and continuously optimised online in your system.

TICKETLESS OPERATION

Be it ticketless parking with free flow cameras, hybrid technology blending ticketless with redundancy, or with classic ticketed barrier solutions: entervo V3 supports all the functions you need for your parking area.

ATTRACTIVE COMMUNICATION & ADVERTISING

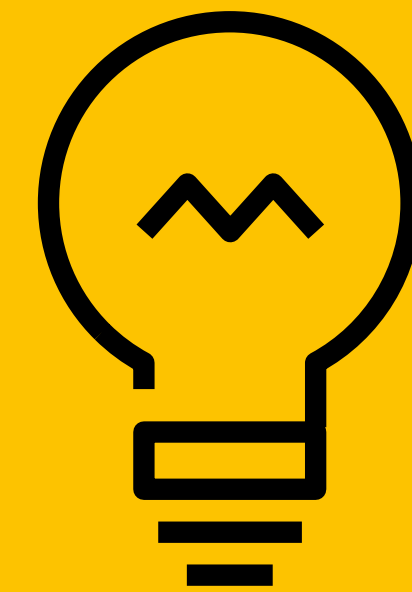

With entervo V3 and the entervo.sign customer display, you can enter into a new world of communication with your customers and open up additional revenue opportunities through digital advertising.

GATEWAY TO DIGITISING PARKING

The integrated connection to mobility CONNECT allows you to authorise any desired mobility service provider for your car park and thus tap into new customer groups.
